Re: Prototype P396  
Work Platform Tractel MP03

Dear Mr. Theve:

On May 2, 2002, we issued a temporary approval to the Tractel work platform model MP03 subject to reevaluation in one year. In view of the fact that, during the past year, this equipment has been used on several work sites in the city and no incidents have been reported, we are pleased to inform you that the Tractel work platform MP03 is now approved for use in the city of New York, subject to compliance with the configuration on file under prototype P396.

Any modification will have to be addressed by an amendment to the prototype P396 with the required engineering and testing reports. If there is need for additional clarification, please do not hesitate to call my office.

Sincerely yours,

Roland Durant
