

V5009
Formerly LIN-23309

Fallstop® beam clamp constitutes a safe means of anchorage to an overhead "I" beam with a flange of 3.0 to 8.25 inches (75 to 210 mm). Manually adjustable, the beam clamp presents a simple design for quick and easy installation.

⚠ WARNING Always work directly under the anchorage point to avoid a swing fall injury.

Applicable standards:

Meets ANSI, OSHA and CSA 5,400 lbs. (24 kN) requirements for anchorage connection.

Unit specifications:	V5009
Capacity	310 lbs. (140 kg) one person
Width of beam	3.0 to 8.25 in. (75 to 210 mm)
Weight	12.3 lbs. (5.6 kg)
